ZEDER INVESTMENTS LIMITED – Unaudited Results

The net asset value per share increased by 19.3%, from 373 cents per share at 31 August 2020 to 445 cents per share at 31 August 2021, mainly as a result of the increased valuations of TLG, Capespan and Kaap Agri, countered by the special dividend paid to shareholders during the reporting period. Headline earnings per share increased from a loss of 14.3 cents per share to a gain of 31.4 cents per share mainly as a result of the increased valuations of TLG, Capespan and Kaap Agri since the prior comparative reporting period. Attributable earnings per share decreased by 67.1% from 95.3 cents per share to 31.4 cents per share, mainly as a result of the significant non-headline gain on deemed disposal and reacquisition of investments, as a result of the change in investment entity status from 1 March 2020 and the non-headline gain on disposals of Pioneer and Quantum, both included in the prior comparative reporting period. Profit before finance costs and taxation from continued operations per Zeder’s consolidated income statement increased by 66.2% from R296m in the prior comparative period to R492m. Zeder’s dividend policy remains to pay dividends conditional on the Group having sufficient reserves to fund its operations, investments, and growth plans. The board has taken the decision not to declare an interim dividend for the six-month period ended 31 August 2021 (31 August 2020: Rnil) also in view of the recent special dividends paid.

SIRIUS REAL ESTATE LIMITED – Trading Update

Sirius Real Estate, the leading owner and operator of branded business and industrial parks providing conventional space and flexible workspace in Germany, provides an update on trading for the six months to 30 September 2021. The Company is pleased to report a six-month trading period that has seen an increase in like for like annualised rent roll of 2.5% to €98.9 million, from €96.5million at March 2021. This was driven by a 2.6% increase in like-for-like average rental rate highlighting strong occupier demand and the reversionary potential within the portfolio. Total annualised rent roll increased by 3.3% to €99.7 million and, with a modest contribution in the first half of the financial year due to the timing of completions, the impact from acquisitions is expected to be greater in the second half. Like-for-like occupancy remained broadly flat at 86%, whilst total occupancy reduced to 85% (March 2021: 87%) primarily as a result of the acquisition of 23,000 sqm of vacant space within the Essen and Ohringen assets that completed within the period. In line with its strategy, the Company intends to utilise its asset management platform to increase occupancy and net operating income at these assets. The cash collection rate for the six-month period to 30 September 2021 was approximately 97.4%, with €2.0 million outstanding rent and service charges from total billing of €76.7 million.

AMERICAN MARKET COMMENTARY

SELECTED HEADLINES

US stocks staged a comeback on Wednesday as investors grew optimistic about a debt ceiling deal and bought into technology stocks. Stocks reversed course on news that Senate Minority Leader Mitch McConnell told a closed meeting of Republicans that he would offer a short-term debt ceiling extension later Wednesday. That would help relieve some pressure on Congress to avoid a U.S. default currently expected on Oct. 18. Investors bought the dip in some key technology stocks. Microsoft rose 1.5%, Amazon gained nearly 1.3%, and Nvidia popped 1.2%.

COMMODITY MARKET COMMENTARY

Gold prices were flat this morning as the dollar held firm, as investors moved to the sidelines ahead of a U.S. payrolls report that is expected to provide clues on the Federal Reserve's tapering timeline. Oil prices dropped for a second session earlier today, under pressure from an unexpected rise in U.S. crude stocks that raised concerns over demand after prices rallied to multi-year highs

The rand retreated on Wednesday, pressured by a firmer dollar and rising U.S. Treasury yields, as nervousness that surging energy prices will stoke inflation and interest rate hikes drove investors towards safe haven assets. At the close, the rand was trading around R14.97 to the dollar, 0.01% firmer. On Wednesday, the focus returned to global events, chiefly U.S. jobs data to be released on Friday when investors will seek clues on the timing of Federal Reserve policy tightening.
