

**Global balanced portfolio**
**November 2021**

**OBJECTIVE** The primary objective is to provide above-average total returns (capital plus income) over a medium to long-term investment horizon, by investing in ordinary shares listed globally. The portfolio is designed to achieve a balance between income and capital growth. It will have between 40% and 75% in international equities and to manage overall risk, the portfolio will include exposure to fixed interest and cash. For diversification there may also be an allocation to alternatives and property funds. The underlying global fixed income exposure will predominately be focussed on investment grade government and corporate bonds, and will actively seek a total return for investors, through generating a reasonable income while attempting to preserve capital. Global fixed income exposure is provided through employing an active asset allocation approach to investing in fixed income assets across the investible global universe. This may include investing in direct bonds, and funds for diversification benefits, of global developed governments, global investment grade corporates, global emerging markets and global high yield.

**WHY CHOOSE THIS PORTFOLIO** This mandate is suitable for investors who are looking for a balance of risk and reward. They accept that seeking higher returns means there is an increased risk of capital loss compared with a more cautious strategy, but wish to balance this with a desire to avoid high levels of risk within their portfolio as a whole. Equity and property exposure will range between 40% – 75% and fixed income/alternatives/cash allocation will range between 25% – 60%. Investors in this portfolio could be exposed to potentially significant volatility due to a combination of underlying share price movements and foreign exchange impacts on portfolio returns.

## GLOBAL EQUITY COMMENTARY

In November equity markets were negative across major geographies. The MSCI World ended the month down -2.2%. The MSCI North America was down -1.2% whilst the MSCI Europe excluding UK was down -5.1%. The MSCI UK All Cap was down -5.6%, the MSCI Japan was down -2.5% and the MSCI Asia excluding Japan decreased by -6.3%. The MSCI Emerging Markets index was down -7%.

The Global Balanced portfolio underperformed the MSCI World Index by -1.59% during November. The underweight allocation to Consumer Discretionary and overweight to Healthcare were the largest detractors this month, this was offset by an underweight allocation to Financials and Energy companies.

In terms of stock selection, NetEase was the best performer in absolute terms rising by 10.6%. Other notable performers were Akamai (+6.9%) and Roche (+1.2%). Sabre (-27.5%) and Philips (-24.9%) were the major detractors.

In the month we sold Booking Holdings and bought Visa.

## MANDATORY DISCLOSURE

Participation in this portfolio is a medium to long-term investment. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to its future performance. Calculations are based on a lump sum investment with gross income reinvested. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. A schedule of fees and maximum commissions is available from the manager.

This factsheet provides information on a model portfolio that has been designed to reflect the global equity income portfolio service. Actual investment performance experienced by clients will reflect portfolio specific decision made by the portfolio manager. In practice, the portfolio manager may take up to six months to be fully invested in this portfolio and potentially longer where this is appropriate to do so. This gives the portfolio manager the opportunity to invest in the stocks at an attractive entry point.
