

(MINIMUM DISCLOSURE DOCUMENT)

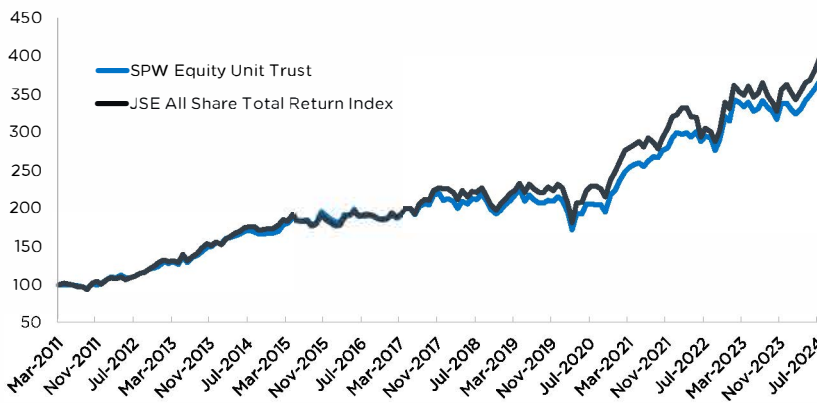

INVESTMENT OBJECTIVE AND STRATEGY

The objective of this portfolio is to provide above average growth in capital over the medium to long term. Income will be of secondary importance. The risk associated with this portfolio will be the same as the risk associated with SA equities as an asset class. Volatility of capital can occur over the short term. The portfolio will invest in liquid assets and in shares across all sectors of the JSE Securities Exchange of South Africa, (JSE Limited). The fund aims to outperform the JSE All Share Index on a total return basis, over an investment horizon of three years or more, by investing in companies that are undervalued relative to their intrinsic value. The investments are subject to rigorous, in-depth research and adhere to our pragmatic value investment philosophy.

The investment manager will also be allowed to invest in financial instruments as allowed by the Act from time to time in order to achieve its investment objective. The portfolio may also invest in participatory interests of underlying unit trust portfolios. The fund may at any time hold a maximum of 45% in offshore assets.

CUMULATIVE PERFORMANCE GRAPHS SINCE LAUNCH

An annual negotiated advice fee is paid via a repurchase of units from the investor.

ACTUAL HIGHEST & LOWEST ANNUAL PERFORMANCE FOR ROLLING 10 YEARS

Highest	27.80%	(2020/2021)
Lowest	-2.91%	(2019/2020)

The highest and lowest annualised performance numbers are based on 10 non-overlapping one year periods or the number of non-overlapping one year periods from inception where performance history does not yet exist for 10 years.

ABOUT THE PORTFOLIO MANAGER

David Lerche B. Bus. Sci (Hons), CFA, CA (SA)

David has 14 years' experience in the asset management industry. He is a CFA charterholder and a qualified CA (SA), and has degrees in finance and accounting. David joined the Sanlam Private Wealth team five years ago as an investment analyst, and has been Head of Equities since the start of 2021. Before this, he spent nine years in institutional stockbroking as an equity analyst servicing major South African and global asset managers.

PORTFOLIO MANAGER'S COMMENTS

The global equity market continued to move higher in the second quarter, with further outperformance from the US over other developed markets. The S&P 500 Index reached a new all-time high, but the gains remained narrow as the equal-weighted S&P 500 Index actually declined while the so-called 'Magnificent 7' US large-cap technology stocks were responsible for most of the returns, rising another 17%. The Eurostoxx 50 and Japanese Topix indices both ended lower in US dollar terms. Developed market equities, as measured by the MSCI World Index, rose 2.6% in US dollar terms in the second quarter while global bonds declined 1.1%. The technology sector rose 11.4% but other sectors struggled to keep momentum, ending the quarter little changed.

After remaining sticky in the first quarter, US inflation numbers continued their downward trajectory in the second quarter. However, the US Federal Reserve remained cautious about the risk of reigniting inflation if it lowers interest rates too early given the strength of the labour market and financial conditions that remain loose. Towards the end of the quarter, global economic data showed signs of cooling with the economic surprise indices of major economies moving into negative territory.

South African equities, as measured by the FTSE/JSE All Share Index, had a strong quarter, gaining 8.2% in rand terms. Given a stronger rand, the return in US dollars was even stronger at 12.3%. This was on the back of improved investor sentiment following the election outcome – the Government of National Unity is expected to continue progress with regard to structural reforms aimed at lifting the country's potential growth rate.

In this context, South African domestic sectors such as banks (+20%) and general retailers (+12%) performed strongly. Unrelated to the political developments, Anglo American rose sharply (+24%) following a takeover bid from BHP.

South African bonds also reacted positively to the election outcome, as the governing parties are seen to be committed to fiscal discipline – the FTSE/JSE All Bond Index gained 7.5% in the quarter. Cash returned 2.1% while local listed property gained 5.5%. The rand strengthened against most currencies, gaining 3.2% against the US dollar.

Considering the sharp rise in interest rates over the past year and the reduction in global money supply, the US economy has remained remarkably resilient. However, we know that monetary policy works with variable lags. Recent economic data has turned softer, but not enough to persuade the Fed to start cutting, as it remains wary of the strong labour market and the risk of reigniting inflation.

The risk-versus-reward outlook for global equities currently doesn't appear very attractive, but the increase in real yields over the past two years has improved the prospective return profile of fixed interest investments. South African equities and bonds screen cheaply after more than five years of domestic and foreign investor outflows. It remains to be seen whether the election outcome has provided the catalyst for the reversal of these investor flows to unlock the value.

The fund recorded a return of 7.8% – net of fees – for the 12 months to the end of July, behind the benchmark return of 9.0% and the median peer return of 9.5%. The underperformance relative to the benchmark over the past year was driven by the fund not owning Capitec, coupled with the overweight position in Sasol, partially countered by the overweight to AngloGold and not owning MTN.

When compared to competing general equity unit trusts, the fund was in the fourth quartile of its peer group over the past 12 months, but remains in the top quartile over three, five and 10 years. In the first seven months of 2024, the fund was behind its benchmark, delivering a 8.6% return compared to the benchmark's 9.9%.

In July, the fund bought a new position in Remgro, where we believe the discount to net asset value was substantially too wide. We also switched half of the AngloGold holding into Goldfields to reduce the single-stock risk associated with gold miners following AngloGold's >40% outperformance versus the benchmark and >35% versus Goldfields since the start of 2024.

GLOSSARY TERMS

Aggressive risk rating Willingness to take risk is reflected both in the types of securities held and in the concentration of holdings in favoured market sectors. Possible loss of capital is accepted. More active portfolio adjustment is typical.

Collective investment scheme (CIS) Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Equities An equity or share represents an institution/individual's ownership in a listed company and is the vehicle through which they are able to 'share' in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase and this translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling. Shares/equities are usually considered to have the potential for the highest return of all the investment classes, but with a higher level of risk i.e. share investments have the most volatile returns over the short term. An investment in this type of asset should be viewed with a 7 to 10 year horizon.

Net asset value (NAV) Net asset value (NAV) is the value of a fund's asset less the value of its liabilities per unit.

MANDATORY DISCLOSURE

Effective 1 October 2024, SCI will charge a monthly administration fee of R20 excluding VAT on retail investors whose total investment value is less than R50,000.

(TER) Period: 1 January 2020 to 30 June 2024.

Total Expense Ratio (TER) 1.52% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Total Investment Charges (TER + TC) 1.64% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

Transaction Cost (TC) 0.12% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Independent professional financial advice should always be sought before making an investment decision. The Sanlam Group is a full member of the Association for Savings and Investment SA. Sanlam Collective Investments (RF) (Pty) Ltd is a registered and approved Manager in Collective Investment Schemes in Securities. Collective investment schemes are generally medium- to long-term investments. Past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager on request. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Forward pricing is used. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date.

Performance is calculated for the portfolio and the individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax. The manager has the right to close the portfolio to new investors in order to manager it more efficiently in accordance with its mandate. The performance of the portfolio depends on the underlying assets and variable market factors. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The management of investments is outsourced to Sanlam Private Wealth (Pty) Ltd (2000/023234/07) is a member of the Johannesburg Stock Exchange, an a licensed Financial Services Provider (FSP 37473) under the Financial Advisory and Intermediary Services Act, 2002 and a Registered Credit Provider (NCRCP1867). The Manager retains full legal responsibility for the co-named portfolio. The portfolio manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Obtain a personalised cost estimate before investing by visiting www.sanlamunittrustsmdd.co.za and using our Effective Annual Cost (EAC) calculator. Alternatively, contact us at 0860 100 266.
