**INVESTMENT OBJECTIVE AND STRATEGY**

The objective of this portfolio is to provide above average growth in capital over the medium to long term. Income will be of secondary importance. The risk associated with this portfolio will be the same as the risk associated with SA equities as an asset class. Volatility of capital can occur over the short term. The portfolio will invest in liquid assets and in shares across all sectors of the JSE Securities Exchange of South Africa, (JSE Limited). The fund aims to outperform the JSE All Share Index on a total return basis, over an investment horizon of three years or more, by investing in companies that are undervalued relative to their intrinsic value. The investments are subject to rigorous, in-depth research and adhere to our pragmatic value investment philosophy.

The investment manager will also be allowed to invest in financial instruments as allowed by the Act from time to time in order to achieve its investment objective. The portfolio may also invest in participatory interests of underlying unit trust portfolios. The fund may at any time hold a maximum of 30% in offshore assets.

**CUMULATIVE PERFORMANCE GRAPHS SINCE LAUNCH**

**PORTFOLIO INFORMATION**

Risk rating	Aggressive
Issue date	21 August 2020

**ACTUAL HIGHEST & LOWEST ANNUAL PERFORMANCE FOR ROLLING 10 YEARS**

Highest	26.40%	(2013/2014)
Lowest	-2.91%	(2019/2020)

The highest and lowest annualised performance numbers are based on 10 non-overlapping one year periods or the number of non-overlapping one year periods from inception where performance history does not yet exist for 10 years.

## ABOUT THE PORTFOLIO MANAGER

### David Lerche B. Bus. Sci (Hons), CFA, CA (SA)

David joined the business in 2016 as senior investment analyst. He is responsible for analysis of a wide range of industrial companies. He began his investments career as a research analyst at Avior Capital Markets, where he spent nine years servicing institutional asset managers in SA, the UK and around the world. He has twelve years' investment experience.

## PORTFOLIO MANAGER'S COMMENTS

July was a 'risk-on' month as global equities continued the advance that started late in March. South African equities followed the momentum higher as our market – as measured by the FTSE/JSE All Share Index (ALSI) – gained 2.6% in the month. Globally, emerging market equities took the lead from developed markets as the former gained 9% in US dollar terms compared to the 4.8% gain of the latter.

The local headline index doesn't reflect the true nature of the advance. In reality, the ALSI gain can be attributed largely to the very strong performance of mining shares. Gold shares were unstoppable as the sector gained 23.2%, followed by a similarly strong performance by platinum counters, that gained 20% in the month. The tobacco sector was the big laggard – the sector declined by 12%. Travel and leisure shares also experienced headwinds for understandable reasons, retreating by 16.5%.

After a modest bounce in June, property counters were once again under pressure – the sector declined by 3.2%.

The fund recorded a return of -2.9% – net of fees – for the 12 months to the end of July, underperforming the benchmark return of 1.6%, but in line with the median peer return of -3.2%. The fund's underperformance relative to the benchmark over the past year was driven by the overweight position in Sasol and the lack of exposure to gold mining companies, partially countered by the positive effects of an overweight position in British American Tobacco and a relatively high cash holding in February and March when the market sold off. The fund returned -4.4% over the year to date in 2020, behind the market's -0.7%.

When compared to competing general equity unit trusts, the portfolio was in the top half of the peer group over the past 12 months, three years and five years.

In July, the fund added platinum exposure via Northam, which we expect to benefit from growing production volumes over the coming years, aided by its relatively higher exposure to rhodium than peers. To pay for this, the fund slightly reduced its stake in Anglo American after it had almost doubled since we added to it close to the lows in March.

## GLOSSARY TERMS

**Aggressive risk rating** Willingness to take risk is reflected both in the types of securities held and in the concentration of holdings in favoured market sectors. Possible loss of capital is accepted. More active portfolio adjustment is typical.

**Collective investment scheme (CIS)** Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

**Equities** An equity or share represents an institution/individual's ownership in a listed company and is the vehicle through which they are able to 'share' in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase and this translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling. Shares/equities are usually considered to have the potential for the highest return of all the investment classes, but with a higher level of risk i.e. share investments have the most volatile returns over the short term. An investment in this type of asset should be viewed with a 7 to 10 year horizon.

**Net asset value (NAV)** Net asset value (NAV) is the value of a fund's asset less the value of its liabilities per unit.

**(TER) Period: 1 July 2017 to 30 June 2020**

**Total Expense Ratio (TER)** 1.77% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

**Transaction Cost (TC)** 0.17% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

**Total Investment Charges (TER + TC)** 1.94% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

## MANDATORY DISCLOSURE

All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Sanlam Collective Investments (RF) (Pty) Ltd is a registered and approved Manager in Collective Investment Schemes in Securities. Collective investment schemes are generally medium- to long-term investments. Past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager on request.

Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Forward pricing is used. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date.

Performance is calculated for the portfolio and the individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax. The manager has the right to close the portfolio to new investors in order to manager it more efficiently in accordance with its mandate. The performance of the portfolio depends on the underlying assets and variable market factors. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio.

All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.

The management of investments is outsourced to Sanlam Private Wealth (Pty) Ltd (2000/023234/07) is a member of the Johannesburg Stock Exchange, an a licensed Financial Services Provider (FSP 37473) under the Financial Advisory and Intermediary Services Act, 2002 and a Registered Credit Provider (NCRCP1867). The Manager retains full legal responsibility for the co-named portfolio. The portfolio manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
