

SPW FLEXIBLE PORTFOLIO

31 JULY 2023

PORTFOLIO DESCRIPTION AND INVESTMENT OBJECTIVE

This multi-asset class portfolio invests both locally and offshore. Local assets may include equities, bonds, money market instruments and property. Offshore exposure is obtained through direct investment in listed instruments and/or investment in collective investment schemes. The mandate allows for an unconstrained view, both from an asset allocation and a stock-picking perspective. Portfolio management is likely to reflect high-conviction calls and high levels of trading activity, both of which will at times reflect tactical investment calls. The asset classes will be selected on the potential to generate nominal performance and not on a relative valuation perspective.

YOUR PERSONAL EQUITY PORTFOLIO

The SPW Flexible Portfolio is constructed by the investment team based on an intensive and rigorous investment process. It acts as a guide to your portfolio manager in customising your personal portfolio to suit your individual requirements. Note that the performance on this fact sheet is based on the model portfolio - the performance of your portfolio may vary, depending on the level of deviation from the model and the fees charged.

WHY SELECT A PERSONAL PORTFOLIO

A personal portfolio is suitable to discerning investors who might have unique factors to consider during the investment process. Your investment can be tailored to your requirements, you have more direct access to your portfolio manager and you have direct ownership of shares. Your portfolio will not be affected by the cash investment and withdrawals of other investors.

ABOUT THE PORTFOLIO MANAGER

David Lerche, CFA, CA (SA)

David has 14 years` experience in the asset management industry. He is a CFA charterholder and a qualified CA (SA), and has degrees in finance and accounting. David joined the Sanlam Private Wealth team five years ago as an investment analyst, and has been Head of Equities since the start of 2021. Before this, he spent nine years in institutional stockbroking as an equity analyst servicing major South African and global asset managers.

PORTFOLIO MANAGER'S COMMENTS

The portfolio delivered nominal performance of 7.9% for the 12-month period to the end of July. This return missed the inflation-plus-5% target for the period. Not only have the higher recent inflation numbers raised the performance bar materially, but the benchmark of CPI+5% has proved to be a tough measuring stick over the past five years. However, the good performance over 36 months (11.9% per annum) surpassed the inflation-plus benchmark of 10.8% per annum for the period. The portfolio has recorded a credible 8.4% per annum after costs since inception.

Over the past 12 months, the poor performance of government bonds (both locally and globally), which struggled to beat inflation, hampered the fixed income performance of the portfolio in the short term.

In July, we added hedge fund exposure to the asset allocation mix of the portfolio. The aim is to reduce risk in the portfolio without sacrificing potential returns through using a hand-picked blend of hedge fund managers, specifically optimised for our clients' multi-asset portfolios.
