

SPW GLOBAL EQUITY DIVERSIFIED PORTFOLIO

31 AUGUST 2023

PORTFOLIO DESCRIPTION AND INVESTMENT OBJECTIVE

The primary objective is to provide above-average total returns (capital plus income) over a medium to long-term investment horizon, by investing in ordinary shares listed globally. Management will typically not be trading orientated, holding concentrated equity positions reflecting the manager’s best ideas globally and limited to 10% individual positions.

The portfolio is characteristically dominated by companies with a global footprint and an impressive track record of growing profits and well-entrenched industry market positions.

WHY SELECT A PERSONAL PORTFOLIO

The portfolio is designed to meet the needs of investors looking for concentrated equity exposure through a directly held and actively managed portfolio of quality global shares reflecting our highest conviction views in respect of market groupings, sectors and fundamentals.

Volatility of portfolio returns could be high due to a combination of underlying equity volatility and the impact of foreign exchange fluctuations, which historically has been high.

GLOBAL ANALYSIS

PORTFOLIO ADVISERS COMMENTS

The Global Equity Diversified model outperformed the MSCI World Index during the month returning -1.87%, whilst the index returned -2.39%.

The best performing stock during the month was Akamai (+11.2%). The company has two primary businesses. The legacy business is the world's largest content delivery network (CDN). A CDN is a geographically distributed group of servers that store content close to end users. The network allows for quick transfer of assets needed for loading internet content, including videos. As the amount of data that traverses the internet grows, Akamai's network becomes more valuable. Their historic investment into their network means they are the most reliable partner for large enterprises that want their websites, videos, and games to reach customers in the most efficient manner. Akamai's second business is in cybersecurity and cloud.

This is faster growing and less capital intensive than their CDN business and, in their most recent results, made up 59% of revenues. Guidance was raised at these results, leading to strong share price performance. Other strong performers during the month were Philips (+8.3%) and Intuit (+5.9%). Philips responded well to the news that the Turin-based Agnelli family had acquired a 15% stake in the business, in the open market. Intuit reported strong full-year results. In terms of laggards, Electronic Arts (EA) (-11.9%) and Alibaba (-9.1%) underperformed. EA reported their Q1 results which provided guidance for Q2. This guidance was below expectations, but full-year guidance was maintained. Alibaba also reported results ahead of expectations, but a slew of poor Chinese news flow continues to affect share prices.

MANDATORY DISCLOSURE

Participation in this portfolio is a medium to long-term investment. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to its future performance. Calculations are based on a lump sum investment with gross income reinvested. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. A schedule of fees and maximum commissions is available from the manager.

This factsheet provides information on a model portfolio that has been designed to reflect the global equity income portfolio service. Actual investment performance experienced by clients will reflect portfolio-specific decision made by the portfolio manager. In practice, the portfolio manager may take up to six months to be fully invested in this portfolio and potentially longer where this is appropriate. This gives the portfolio manager the opportunity to invest in the stocks at an attractive entry point.
