

SPW GLOBAL EQUITY FOCUSED PORTFOLIO

31 AUGUST 2024

PORTFOLIO DESCRIPTION AND INVESTMENT OBJECTIVE

The primary objective is to provide above-average total returns (capital plus income) over a medium to long-term investment horizon, by investing in ordinary shares listed globally. Management will typically not be trading orientated, holding concentrated equity positions reflecting the manager’s best ideas globally and limited to 10% individual positions.

The portfolio is characteristically dominated by companies with a global footprint and an impressive track record of growing profits and well-entrenched industry market positions.

WHY SELECT A PERSONAL PORTFOLIO

The portfolio is designed to meet the needs of investors looking for concentrated equity exposure through a directly held and actively managed portfolio of quality global shares reflecting our highest conviction views in respect of market groupings, sectors and fundamentals.

Volatility of portfolio returns could be high due to a combination of underlying equity volatility and the impact of foreign exchange fluctuations, which historically has been high.

GLOBAL ANALYSIS

PORTFOLIO ADVISERS COMMENTS

The Global Equity Focused portfolio outperformed the MSCI World Index during the month, returning 2.79% while the index returned 2.64%.

The best performing stock during the month was Yum China (+12.3%). The company released its second-quarter results, which were better than the market was expecting. The business is showing resilience amid a tough macro backdrop in China where the property market slowdown is hitting consumer confidence. We remain confident that the long-term growth opportunity for Yum China remains attractive. Just 20% of restaurants in China are chains versus 35% globally and 60% in the US. Management has guided to 20 000 restaurants by the end of 2026 versus just over 15 000 today. In China, KFC has seven stores serving every one million people. In Tier 1 cities there are 20 stores serving every one million people, underlining the opportunity in lower-tier cities. Cash returns will also be an important part of the story with US\$3 billion guided to be returned to shareholders by the end of 2026 versus a market capitalisation of US\$13 billion.

Other strong performers during the month were CME Group (+11.4%) and London Stock Exchange (+11.1%). CME is the world's leading derivatives marketplace and profits from market volatility, of which we have seen plenty this year. CME is a new position in the portfolio.

In terms of laggards, NetEase (-12.7%) and Samsung (-9.6%) underperformed. NetEase had results that were below market expectations as it continues to seek its next big gaming hit. Samsung had a volatile month along with many other semiconductor names.

MANDATORY DISCLOSURE

Participation in this portfolio is a medium to long-term investment. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to its future performance. Calculations are based on a lump sum investment with gross income reinvested. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. A schedule of fees and maximum commissions is available from the manager. This factsheet provides information on a model portfolio that has been designed to reflect the global equity income portfolio service. Actual investment performance experienced by clients will reflect portfolio-specific decision made by the portfolio manager. In practice, the portfolio manager may take up to six months to be fully invested in this portfolio and potentially longer where this is appropriate. This gives the portfolio manager the opportunity to invest in the stocks at an attractive entry point.
