

Global equity income portfolio

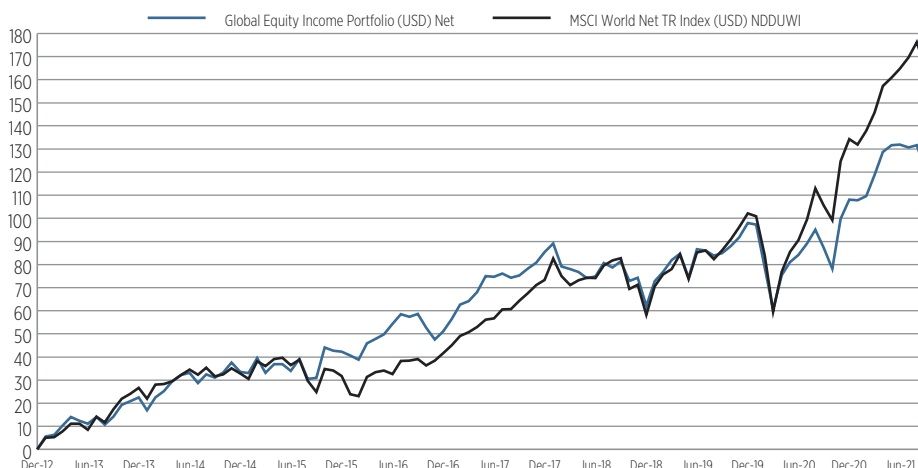

September 2021

**OBJECTIVE** The primary objective is to provide above-average total returns (capital plus income) over a medium to long-term investment horizon, by investing in ordinary shares listed globally. The management will typically not be trading orientated, holding concentrated equity positions reflecting the manager's best ideas globally and limited to 10% individual positions.

**WHY CHOOSE THIS PORTFOLIO** The portfolio is characteristically dominated by companies with a global footprint and an impressive track record of growing profits and dividends and well entrenched industry market positions. The portfolio will focus on companies with attractive dividend yields and healthy balance sheets. Companies should have a long history of growing dividends in the medium term due to robust business models and prudent management teams acting in the best interests of shareholders.

COMMENTARY

In September equity markets were largely negative across major geographies. The MSCI World ended the month down -4.2%. The MSCI North America was down -4.7% whilst the MSCI Europe excluding UK was down -5.5%. The MSCI UK All Cap was down -2.9%, the MSCI Japan was up 2.8% and the MSCI Asia excluding Japan decreased by -3.6%. The MSCI Emerging Markets index was up 0.7%.

The Global Equity Income portfolio underperformed the MSCI World Index by -0.65% during September. The overweight allocation to Consumer Staples and Healthcare were the largest detractors this month, this was offset by an underweight allocation to Industrials and IT companies.

In terms of stock selection, BP was the best performer in absolute terms rising by 12.2%. Other notable performers were Exxon Mobil (+7.9%) and Sabre (+5.4%). Ali Baba (-11.3%) and Novartis (-11.2%) were the major detractors.

**MANDATORY DISCLOSURE**

Participation in this portfolio is a medium to long-term investment. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to its future performance. Calculations are based on a lump sum investment with gross income reinvested. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. A schedule of fees and maximum commissions is available from the manager.

This factsheet provides information on a model portfolio that has been designed to reflect the global equity income portfolio service. Actual investment performance experienced by clients will reflect portfolio specific decision made by the portfolio manager. In practice, the portfolio manager may take up to six months to be fully invested in this portfolio and potentially longer where this is appropriate to do so. This gives the portfolio manager the opportunity to invest in the stocks at an attractive entry point.
