

SPW MODERATE BALANCED PORTFOLIO

28 FEBRUARY 2023

PORTFOLIO DESCRIPTION AND INVESTMENT OBJECTIVE

This multi-asset class portfolio invests in equities, bonds, money market instruments and property, both locally and offshore. This portfolio will aim for long-term capital growth. However, a higher exposure to growth assets (equities and property) is likely to lead to higher volatility over the short term. Investment performance will be driven by active stock picking and asset allocation. This portfolio may have a maximum effective equity exposure (including international equity) of up to 65% and a maximum effective property exposure (including international property) of up to 25% of the market value of the portfolio. Total allowable offshore exposure is 30%.

YOUR PERSONAL BALANCED PORTFOLIO

The SPW Moderate Balanced Portfolio is constructed by the investment team based on an intensive and rigorous investment process. The model portfolio acts as a guide to your portfolio manager in customising your personal portfolio to suit your individual requirements. It is important to note that the performance on this fact sheet is based on the model portfolio and the performance of your portfolio may vary depending on the level of deviation from the model portfolio and the fees charged.

WHY SELECT A PERSONAL PORTFOLIO

A personal portfolio is suitable to more discerning investors who might have unique factors to consider during the investment process. With a personal portfolio, your investment can be tailored to your unique requirements. You will have the benefit of more direct access to your portfolio manager. Your portfolio will not be affected by the cash investment and withdrawals of other investors.

## PORTFOLIO MANAGER'S COMMENTS

Following a stellar start to the year in January, markets were on the back foot again in February as a tight labour market in the developed world and persistent inflation raised concerns that central banks would have to ultimately raise interest rates more than previously expected.

South African equities, as measured by the FTSE/JSE All Share Index, declined by 2.2% in February. The rand weakened substantially during the month, resulting in a US dollar decline of 7.0% for the local market versus -2.4% for global equities.

Resources shares dragged our local market lower with the resources index falling by 13%, while industrial and financial shares fared materially better, managing to squeeze out positive returns of 1.7% and 2.5% respectively in rand terms. Bond prices faced the pressure from rising yields internationally, with the FTSE/JSE All Bond Index declining by 0.9% in February. Cash returned 0.6%. Local listed property followed the bond market lower, declining by 0.7%.

The SPW Moderate Balanced portfolio delivered a return of 9.74% for the 12 months to the end of February, outperforming the peer group average by 355 basis points. Outperformance was driven by a combination of asset allocation and equity selection, both local and offshore. The portfolio was overweight in South African equities and defensively positioned offshore.

The one-year performance has put the portfolio on the 94th percentile against competitors. The portfolio achieved a 93rd percentile position versus peers over 10 years. During the month of February, we moved the portfolio more defensively by taking profits on Investec, Standard Bank, MultiChoice and Bidcorp, and increasing our holding in US Treasuries.
